### **DETAILED ACTION**

This communication is in response to amendment received on 2/12/09.

Claims 12, 13 and 15 – 23 are presented for examination.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 12, 13 and 15 – 23 are rejected under 35 U.S.C. 102(b) as being anticipated by Yabe et al. (hereinafter Yabe) (4,918,521).

As to claims 12, 13 and 15 – 23, Yabe discloses a solid state imaging apparatus comprising at least one image converting element (46); at least one additional element (121); and at least one interlock (131) for connecting the image converting element (46) to the at least one additional element (121) (Fig. 14, col. 14, lines 45 – col. 15, line 39); wherein at least one of the image converting element (46) and the additional element (121) includes at least one connecting element having an undercut (122), the connecting element (46) being a component of the interlock (131).

### ***Response to Arguments***

Applicant's arguments filed on 2/12/09 have been fully considered but they are not persuasive. Applicant's argument that Yabe fails to disclose "a connecting element
